FARM AND HOUSEHOLD.

What is Aucrain, or the Texas Cattle Pinuse.

We notice the disease, whose name is piaced at the head of this article, has smade its appearance in Illinois, Ohio, New York, Tennessee, and probably in other states, and that northern veterinary surgeons, having little experience in the treatment of the malady, have mintaken its cause and character. The oldest record of this plauge is in Egypt, where it is indigenous in a cotton region as it is in our sea land cotton climate from the tide water district of Virginia to the Rio Grande. Before the exodus of the Israelites it is thus referred to. "If thou refuse to let the Hebrews go, and wiit hold them still, behold the nand of the Lord is upon thy cattle which is in the field, upon the horses, upon the asses, upon the camel, upon the ox and upon the sheep, there shall be a grevious murrain; and the Lord shall ever between the cattle of Israel and the cattle of ligypt, and there snall nothing die of all

the children of Israel. And the Lord did that "hing on the morrow."

Thus plauge is mentioned or described by Homor, Hippocrates, Plutarch, Livy and Virgit; while its history from the by Homor. Hippocrates, Plutarch, Idvy and Virgit; while its history from the age of Virgit to the present day is exceedingly interesting. It was the prevalence of a flightly contageous and tatal cattle fever in Europe about one hundred and twenty-five years ago that caused the inst veterinary school to be established first veterinary school to be established on the countries of this specific plants and thicken with a braten erg wood to observe the enemy, but they had hardly been gone a moment when a strong force of infantry and cavalry came over the first over the hill, upon which the Cossacks add the beef, which, of course, should be sliced as thin as possible and immediately remove from the first, as the less it is cooked the better; if the beef is very ready for their work. The Turkish company the contingent of the contingent in a little manufacture. on the continent. The true cause of this malarial disease was not known until hot water before going into the gravy, quite recently; and only those physicians who make it a part of their professional duty to keep posted in the rapid progress of science appear to understand the problem. Veterinary doctors in Illinois and 'Ohio have very sapieatly told the public that the numerous ticks on southern cattle (well known to many 5, walk on this it makes their feet sore. These they lick with their tongues, the country and their feet sore. of science appear to understand our readers) produce the lever, corrup-tion and death. They sught as well ascribe the manger of the dog to the bite of fleas, or the cot and flukes in the liver f the sheep to ticks in its wool. Men often practice the healing art on farm house is entirely abandoned by them.

sock with little reading and less science.
The light of truth comes not when the blind lead the blind, but from systematic

The Housekeeper.
The frugst smil, with forcess of repose,
Carries his homes with his whos'er he gom;
Peeps out, and if there comes a shewer of rain,
Retreats to his small dambel smain.
Touch but a tip of him, a horry, 'tis well—
He ourle up in his sanctuary shell
He'a his own issuitord, his own issuant; stay
Long as he will he dreads no quarter day.
Himself he heards and bedger, both invises
And feasts himself; siespe with himself at nights.
He sparse the upholsterer isouble to procure
Chatteis; himself is his own territore.
And his sole riches. Wherease't he room,
Kunck when you will he's sure to be at home.
—Cheries Lond. study and research.

Texas cattle, full of the germs of murrain, brought to Louisiana, as to New Orleans market, do not give the disease to cattle there, because the local climate is malarial like that of Texas. Bring these cattle to the bealthy, non-malarial districts of Tennessee, and southern organisms of pestilence find new and sh pastures, and cattle susceptible to cisons. Southern cattle improve in a calthier climate, while northern animals

mineral district, may poison, little by little, their blood, milk and flesh. Such milk sickness is not contagious for the reason that no deleterious melecule of metal earth or gas can multiply itself, and pass indefinitely from one animal or person to another. With living germs, of sugar to a cream; add two eggs, well beaten; and half a nutmeg; then beat half a pint of sherry or Madeira as bot as possible, without boiling bring one pint of water to boiling is another saucepsn, and stir in three spoonfuls of corn starch, smoothed in a little cold water. Cook rapidly for a few moments, whether plant or animal, the case is All parasites, whether visible, like mits and lick, or invisible like tricking, not only spread from one post

by sulphur; and to give cattle, sheep, hogs and herses a lick of equal parts of sait and sulphur placed within their reach, throws the sulphur remedy into their systems to act as a preventive or cure. For persons laboring under any common majarial disease, one may take equal parts of aulphur and cream of tartar, in moderate doses, morning and

Draining all awamps will do much to purify the atmosphere, and lesson its numidity. A useful book might be numidity. A useful book might be written on marrain climate of the south, drawing the line that bounds it on the north from James river in Virginia to the western bounds of Texas. In another article we will cite authorities illustrative of this line .- Nashville American.

CARAMEL SAUCE.

treated. All other hurtful weeds are to be deed with in a similar manner. But how is the filthy parasite coned "amut" to be got out of seed what? Long neglect has made this energy very injurious on some farms. Washing wheat in bluestone week.

These tiving creatures require more of

our attention and careful study. We

or parasite, whether large or small, exists without parents and antecedent life. In

planting seed wheat, oats, torn or cotton, why should any use infected seed to injure the valuable plants cultivated? This practice is anort-sighted and choosed-

ingly harmitul. Hence, we should clean and purify all seeds planted, all fields and the whole farm. Sound agriculture

is a war of extermination against natural enemics. We all want healthy bread meat, milk, vegetables and fruits. Many cows and steers are poisoned by masses of smut that grow on corn and

other cereals eaten by stock .- Nashville

Worstell.

The Battle of Biels.

A correspondent of the Landon Unity Telegraph telegraphs from the Turkish headquarters on the river Lom, Septemoften husband smut and rust on wheat when we should make war on both, and destroy them. Neither can appear in any crop-or field without living parents, the same as man or a horse. No weed

This morning the Turkish forces advanced to take up positions beyond Vodiska, and at 10 a, m., Sabit and Baker Pashas were making a reconnoissance of our right, the Otteman Larsana and his staff intending to pay a visit to Ahmed Eyouh Pasha, in order to see that commander's part of our general movement carried out. At 11 a, m. we all started to have a look at what was going on in front, and especially to examine the position which Baker Pasha had proposed should be occupied. After discussing moss very frequently, picking out the moss over the goes over his moss very frequently, picking out the vanced to take up positions beyond Vo-diska, and at 10 a, m., Sabit and Baker Pashas were making a reconnoissance on our right, the Ottoman Jarsana and his should be occupied. After discussing the questian thoroughly the Turkish Marshal let us, and soon afterwards we saw Sabit Pasha's division advancing upon our extreme right. Suddenly some guine opened for upon the enemy, and looking in the direction marked out by the harding above. The bags used are of light canvas. Not only does Mr. Wells collect worms, but he also breeds them in considerable to the considerable of the con

hog-flesh is heir to.

This is true, and farmers everywhere will study their interests by keeping swine in clean, pleasant pens.

The istrue, and farmers everywhere will study their interests by keeping squadron taking up positions on the crest of the high ground referred to. Sound of the high ground referred to. Sound of the high ground referred to. our horses were sent under cover at a wood to observe the enemy, but they mander, after a due consideration of the Russian preparations, dispatched two battalions of infantry into a wood on the left, and two more into a vineyard on the right, and after ordering up some receives thought enough had been done, which makes their mouth sore, and the changing shots with our batteries at a distance of not more than one thousand boring rats about it, and eventually the house is entirely abandoned by them.

wished-for positions secured. An incident poisons. Southern cattle improve in a healthier climate, while northern animals clie from southern contagion

One form of sickness is centagious, another is not. We shall try to make this question of contagion plain to our agricultural friends. Cows drinking water from springs or brooks that have copper, lead or arsenic salts in solution, in a mineral district, may poison, little by preserves.

A Chapter on Padding Sances.

Sweet Sauck.

Boil two full cups of sugar with three is worth noting. A Circassian—who nust certainly be allowed to have "pinck" in oother good quality—came out of the remove from the first, and stir in a piece of butter, the size of an egg, and the juice of a lemon, or flaver with three word in the course of the day which is worth noting. A Circassian—who nust certainly be allowed to have "pinck" if no other good quality—came out of the from southern contagion.

The Muscovites naturally returned the fire but the Circassian's back.

us lookers-on was that a Russian bat-talion was descending into a ravine lead-ing round Sabit Pasha's position; that some time afterward the Turkish guns seemed to be firing further back; but

turned the fire, but the Circassian's lucky etar was in the ascendant, and he retired from the unequal duel unharmed. It is so rare a thing to find anything worthy of commendation in these wild tribes that

I am glad to be able to record something in their tavor. The serious part of our work, however. was now to begin, as there was no doubt the Muscovites were threatening our potrickina, not only spread from one post to another, but multiply their species with astonishing rapidity. The farmer should know that every contagion and malarial disorder breeds true to its apecies, so that the organisms of yellow fever can not produce cholera, nor the germs of cholera give axistence to yellow fever. Murrain is a thing of lite, and should be deaft with accordingly. Infected animals should be wholly isolated, cleaused by catharties and strengthened by strong bitters, as a decoction of charry willow and poplar bark.

Many parasitic contagions are expelled by alphur; and to give cattle, sheep, to reinforce us. Three battalions were sent forward, and the fresh gun being at once placed as berbeite, soon made the Russians move say. The greater part Russians move says. compelled to charge our right. The attack was unsuccessful, however, and the enemy was much exposed to our rifles as well as, at times, to the effects of shrapuel. The ravine I have before men-These are all very rich and delicious, for puddings, and, used as a garnish also, they add greatly to the beauty of the pudding when ready for serving. The preserve juice is to be somewhat thicktioned now became so filled with smoke that even the flashes of the rifles could not be seen. Several of our hattaliens had been coming up for some time, and were at once pushed into the wood on one side and the vineyard on the other, until there was no danger of any further ened with corn-starch and boiled; then the fruit thrown in, and all poured over the pudding together. Marmalades and Russian onset. As the combat ended only with daylight, there was no cunnes Reat half a cup of butter and one cup of discovering what the losses could have been; but I think the Turks must have fuls of wine and a little vanilla. Just suffered severely from the shrapnel, and before serving add the white of one egg that the Russians must have sustained beaten to a froth, and stir in half a wineglass of boiling water and beat all to a trated musketry fire, especially as they foam.

ing time a few more words on the subject may not be entirely useless. The seed of the argued grass called cheat or chess is hearly as large as small grains of wheat, capecially if the latter are a little chrombers, is very difficult of expulsion from good company. Where seed wheat if large and plump, a long seive in a good wind will, with the right mesh, send nearly all the cheat into a box below. Good wheat is heavier than cheat, and if both are placed in a tub of water, the wheat will sink while much of the cheat will sink with the wheat. All light wheat and cheat should be taken off and ied to poultry of pigs.

The trouble of remerving this fast is so great that another plan may be practiced.

We have long preferred hand-picking in the field before wheat harvest. After wheat is headed nothing is easier seen than bunches of chest of cockle, which may be pulled in or dug up with a hoe over all the ground. When at Nottingtam, a few days figo I was much pleased at the discovery of a mentirely new industry—namely, the four sometime of milk. Sauce.

MILK SAUCE.

Into a saucepan put one pint of milk. Sauce in while is ready to serve.

Into a saucepan put one pint of milk. Sauce.

MILK SAUCE.

Into a saucepan put one pint of milk. Sauce and stirc constantly till it begins to thicken, when the it is ready to serve.

Put one ounce of butter on the fire in a saucepan; when melted add half a spoonful of flour, sit till it urns yellow then add one pint of water, forty outer of servery scarce, the men have to water the worms are better and heavier. They wheat is headed nothing is easier seen than bunches of chest of cockle, which may be pulled in or of ug up with a hoe over all the ground.

Another words at the discovery of an entirely new industry—namely the water.

Another Words Cultiture.

Another Words Cultiture.

A w

than bunches of chest of cockle, which may be pulled up or dug up with a hoe over all the ground. Where wheat is made the same, using half a gill of rum 2,000 to 6,000 worms are brought in by intended for seed, if this work is carefully done before harvest not a seed of chest or cockle will be found in the wheat thus treated. All other hurtful weeds are to CARAMEL SAUCE.

The worms are sold by the thousand or the worm are sold by the thousand or the made the same, uning half a gill of rum 2,000 to 6,000 worms are brought in by the chousand or the worm are sold by the thousand or the quart. In a warm, moist night from 2,000 to 6,000 worms are sold by the thousand or the worm are sold by the thousand or the

be desit with in a similar manner. But how is the filthy parasite coded "amut" to be got out of seed what? Long neglect has made this entry very injurious on some farms. Washing wheat in bluestone water is the most common and popular remedy. In hand-picking seed-wheat our practice has been the seed, wheat our practice has been the seed, wheat to be found to lessen the seed, wheat of saveres of different kinds for fish and picking or anguille or both.

CARAMEL SAUCE.

Into half a pint of boiling water, put it was heavily.

When the worms are brought in Mr. Wells at once begins his fraining operations, by placing them in properly selected mess. Stag's horn moss will not do at all—it is too hersh. Grass is bad, field moss is the best. The worms are proved the seed, whether fangus or anguille or both.

book.

When a worm is properly rducated he is as tough as a bit of india-rubber and behaves as a worm should when put on a hook. The way to test s worm is to take bini up and pass the finger cently down the length of him. If anything comes out of him he is not fit, and is put back for further training. The meaning of this is that the wild worms contain, more

American.

Steatthy Hogs.

A Michigan farmer says: I have never known of an instance of cholera or any other sickness among hogs that had clean quarters, and were fed regularly, kept warm and dry, although fed exclusively on corn, and if they had pure drink. I do not atterbute this disease (hog cholera) tu any one cause, but a combination of them. To put a hog in a combination of them. To put a hog in a combination of them. To put a hog in a could, wet, and drink from some filthy pond, is snough to make a hog sick, and to invite every known disease. This is true, and tarmers everywhere

Saw Sabit Pashs & Ortson, and me enemy, and looking in the direction marked out by but he also breeds them in considerable quantities. In his garden is a special heap made of vogetable matter, expressly for the purpose of breeding worms. I shall not, of course, say what substance with this greatest vigor, and intantry were hurried up to the scene of action by Moslem and Muscovite.

While observing the movements of Sabit Pashs, one of our little group of speciators happening to look round espited a couple of Cossacks on a hill about three thousand yards away from us. He at once called attention to the fact, and in a few minutes we saw eight more make their appearance, and then a whole when the young are liberated. I believe when the young are liberated. I believe

from the same egg.

The business of worm selling has been going on some ten years and is gradually increasing.—Frank Ruchland in Land

and Water Disease is in a great many—perhaps the unjority—of instances the underlying cause of mental depression. It will almost invariably be found, for instance, that typochondrines are dyspepties, bilious subjects, and all persons who have had any experience of such persons who have not any experiments of the second of the kidneys and bindder are especially antiport to fits of despondency. The sure way to avercome depression is to try acourse of Hostetter's Stomach Bitters, a cheering of Hostetter's Stomach Bitters, a cheering cordial which is peculiarly antagonistic to the 'blues," as well as to the causes which produce them. This popular and efficacious corrective of a disordered condition of the system remedies the most obstinate cases of integration, billiousness and constipation, overcomes the disorders of the unitary organs, purifies and enriches the blood, and restores vigor to the body as well as elasticity to the mind.

The Latest Fushion for Ladies Our attention has recently been called to the Raciton Matchese Clockings, semething entiresome time afterward the Turkish guns seemed to be firing further back; but inst before it was dark they appeared to have advanced again, and that we then saw a line of skirmishers going quickly forward.

From this it may be concluded that Sabit Pasha's first line was urged on too rapidly, and was consequently driven back, but that reinforcements having arrived the advance was renewed, and the wished-for positions secured. An incident
